Establishment-Temporary-additional clerk-Bellary Division Office on account of Water Works Scheme.

In his demand for temporary office, petty, etc., establishment for 1925-26, the Superintending Engineer, Madras Circle, asked for an additional clerk for doing miscellaneous work and assisting the typist in fair-copying work in the Bellary Division Office. The demand was disallowed in G.O.No.786 W, dated 12th June 1925 pending submission of statistics. The Superintending Engineer since submitted statistics in support of the demand and also applied for another clerk for the Accounts section of the Division Office to cope with the heavy work consequent on the execution of the Bellary Water Works Scheme and the formation of a special sub division for that purpose. further examination of the proposals, the Superintending Engineer has withdrawn his demand for a clerk for the correspondence section but has urged for the sanction to the employment of a clerk for the Accounts section for the following reasons:--

(1) There is an all round increase in the accounts work in the Division office due to the formation of the Water Works Division.

(2) Six major works have been sanctioned in this year, three of them have already been put into execution and the remaining three will be started during the course of the year.

(3) The accounts and registers connected with the water supply scheme and the major works should be maintained correctly from start to finish to avoid accounts irregularities.

(4) Since the formation of the Bellary Water Works Sub-Division in 1924, no additional clerk was sanctioned for the Division office and the extra work was hitherto managed with the existing staff, but as the scheme is in full swing now it has been found quite impossible to get the work extracted from the present establishment. The proportionn between the estimated cost of the Bellary Water Works scheme which is Rs.7.86,000 excluding the cost of pipes and the total cost of the establishment (both executive and clerical etc.,) that will be employed for the sake of these works up to 30th June 1927--the probable date of their completion--which is approximately Rs.54,610/-, works out to only about 7 per cent. The above calculation does not however include the proportionate cost of the Executive Engineer and his staff. I consider that the expenditure on establishment on account of these works might reasonably amount to 10 per cent of the estimated cost of the scheme. As the approximate cost of the establishments that will be employed on the scheme is well within the 10 per cent limit referred to above and as it is also well within the centage charges recoverable from the Bellary Municipal Council viz., Rs.99,860,--the amount reported by the Executive Engineer,--I request that the sanction of Government may be obtained at an early date to the employment of a temporary clerk on Rs.35/- per mensem from the date of entertainment to end of June 1927.

*incl additional clerk now asked for.

The expenditure involved in the current year will be met from the existing provision under "41 Civil Works, Provincial Transferred-Establishment".

I have the honour to be,
Sir,
Your most obedient servant,

P Ranganayakulu 1/9/25
for Chief Engineer, P. W. D.
